

Materials Engineer Production (f/m/d)

10965 Berlin, full-time, as of now

Endless Industries is a manufacturer of 3D printers and specialized continuous fiber filaments. Our continuous fiber 3D printers are designed for industrial applications and enable the production of high-strength and lightweight components. We manufacture our high-quality fiber filaments in our own production facility in Berlin to ensure the highest quality standards.

To strengthen our team, we are looking for a dedicated Materials Engineer (m/f/d) to further advance the technological development of our production facilities.

Your tasks:

- Further development of our production facilities
- Production of continuous fiber filaments
- Process optimization of the entire production
- Carrying out material tests (mechanical properties)
- Preparation of material samples

Your profile:

- Required: Degree in materials science, materials engineering, process engineering or mechanical engineering with a high interest in materials science
- Required: Knowledge of thermoplastics or fiber composites
- Desirable: Experience in working with 3D printers
- Desirable: Experience with extrusion processes
- Required: German speaking - business fluent

We offer:

- A young team and a beautiful new office right at Berlin Viktoriapark
- An exciting and sophisticated production technology
- Opportunities to develop as an expert or team lead

Feel free to send us your CV, certificates and a short e-mail to:
